#### Preface

This volume contains the proceedings of the Ninth International Workshop on Rewriting Logic and its Applications (WRLA 2012) that was held in Tallinn, Estonia, on March 24–25, 2012, as a satellite workshop of the European Joint Conferences on Theory and Practice of Software (ETAPS 2012).

Rewriting logic is a natural semantic framework for representing concurrency, parallelism, communication and interaction, as well as being an expressive (meta)logical framework for representing logics. It can then be used for specifying a wide range of systems and programming languages in various application fields. In recent years, several executable specification languages based on rewriting logic (ASF+SDF, CafeOBJ, ELAN, Maude) have been designed and implemented. The aim of the WRLA workshop series is to bring together researchers with a common interest in rewriting logic and its applications, and to give them the opportunity to present their recent works, discuss future research directions, and exchange ideas.

Previous WRLA workshops were held in Asilomar (1996), Pont-à-Mousson (1998), Kanazawa (2000), Pisa (2002), Barcelona (2004), Vienna (2006), Budapest (2008), and Paphos (2010). Workshop proceedings have been published in Elsevier's Electronic Notes in Theoretical Computer Science (ENTCS) series since its inception in 1996 until 2010, moving to Springer's Lecture Notes in Computer Science (LNCS) for that edition. In addition, selected papers from WRLA 1996 have been published in a special issue of Theoretical Computer Science, selected papers from WRLA 2004 appeared in a special issue of Higher-Order and Symbolic Computation, and a special issue in the Journal of Logic and Algebraic Programming is currently under preparation for extended versions of selected papers of WRLA 2010.

WRLA 2012 will count with Saddek Bensalem as invited speaker. The program of the workshop, including regular papers and papers presenting work in progress, each of which was reviewed by four reviewers, will be completed with invited talks from Santiago Escobar, Mark Hills, Grigore Rosu, and Martin Wirsing.

I would like to thank the authors who submitted their work to WRLA 2012 and who, through their contributions, made this workshop a high-quality event. I would also like to thank the program committee members and the external reviewers for their timely and insightful reviews as well as for their involvement in the post-reviewing discussions. I am also grateful to my friends who provided me with all kinds of help and useful advice, to the invited speakers, to the WRLA steering committee for their work in getting the proceedings published in Springers LNCS series.

I also thank Andrei Voronkov for the excellent EasyChair conference system.

February 7, 2012 Málaga

Francisco Durán

### **Program Committee**

Emilie Balland UHP-LORIA

Artur Boronat University of Leicester

Roberto Bruni Dipartimento di Informatica, Universita' di Pisa

Manuel Clavel Universidad Complutense de Madrid

Grit Denker SRI International
Francisco Durán University of Málaga
Steven Eker SRI International

Santiago Escobar Technical University of Valencia

Kokichi Futatsugi JAIST

Alexander Knapp Universität Augsburg

Dorel Lucanu Alexandru Ioan Cuza University
Salvador Lucas Universidad Politécnica de Valencia
Narciso Martí-Oliet Universidad Complutense de Madrid

José Meseguer University of Illinois at Urbana-Champaign Ugo Montanari Dipartimento di Informatica - Universita' di Pisa

Pierre-Etienne Moreau INRIA-LORIA Nancy

Kazuhiro Ogata JAIST

Miguel Palomino Universidad Complutense de Madrid Grigore Rosu University of Illinois at Urbana-Champaign

Vlad Rusu Inria

Carolyn Talcott SRI International

Mark Van Den Brand TU/e

Martin Wirsing Ludwig-Maximilians-Universitaet Muenchen

Peter Csaba Ølveczky University of Oslo

## **Additional Reviewers**

### $\mathbf{A}$

Abraham, Erika Arusoaie, Andrei  ${f B}$ 

Bach, Jean-Christophe Brauner, Paul ${\bf E}$ 

Ellison, Chucky  ${f F}$ 

 ${\bf Fantechi,\ Alessandro}$ 

 $\mathbf{K}$ 

Kuiper, Ruurd  $\mathbf{L}$ 

Lluch Lafuente, Alberto $\mathbf{M}$ 

Meredith, Patrick  $\mathbf{p}$ 

Prugniel, Francois

Vandin, Andrea

 $\mathbf{W}$ 

Wijs, Anton

# Table of Contents

Rigorous Component-based System Design	1
Narrowing in Rewriting Logic and applications	7
Analyzing PHP Source Code Using Rascal - a Rewriting Logic Perspective Mark Hills, Paul Klint and Jurgen Vinju	8
The K Framework Distilled  Dorel Lucanu and Grigore Rosu	9
Design and Analysis of Cloud-Based Architectures with KLAIM and Maude	10
Making Maude Definitions more Interactive	11
Bounded Model Checking of Recursive Programs with Pointers in K  Irina Mariuca Asavoae, Frank De Boer, Marcello M. Bonsangue, Dorel Lucanu and Jurriaan Rot	26
Model Checking LTLR Formulas under Localized Fairness	29
Modelling and Analyzing Adaptive Self-Assembling Strategies with Maude Roberto Bruni, Andrea Corradini, Alberto Lluch Lafuente, Fabio Gadducci and Andrea Vandin	48
Some Like It Very Hot: Formal Modeling and Analysis of Extreme Heat Exposure to the Human Body in HI-Maude	68
Order-Sorted Equality Enrichments Modulo Axioms	69
Timed CTL Model Checking in Real-Time Maude	89
State Space c-Reductions of Concurrent Systems in Rewriting Logic Alberto Lluch Lafuente, Jose Meseguer and Andrea Vandin	185
Specifying and Analyzing the Kademlia Protocol in Maude	128
Using narrowing to test Maude specifications	144

A Rule-Based Framework for Building Superposition-Based Decision	
Procedures	164
Elena Tushkanova, Alain Giorgetti, Christophe Ringeissen and Olga	
Kouchnarenko	
Facilitating the Transformation of State Machines from Equations into	
Rewrite Rules	183
Min Zhang and Kazuhiro Ogata
